EXPERIENCE

ERICSSON (CHINA) COMMUNICATIONS CO. LTD

- UPG release team leader & UPG test coordinator
2018.7 - now Responsible for product verification life cycle which include test plan, customer requirement & test analysis, impact towards existing CI automation FT & ST & test environment, new test cases design and product release test. During this period, integrate all the characteristic and stability test in CI. Good test strategy and plan which help me to win the Spot Award in programs
- UPG Micro Company scrum master
2018.3 – 2018.6 Led team to participate in the bidding of CMCC-NB IoT project, actively connected with UPG customers and other nodes, completed the demand analysis, function realization, products integration and Lab test together with the team, and successfully completed the Demo
- UPG Micro Company FT tester
2017.10 – 2018.2
User360 ST Improvement: Break through the existing hardware bottleneck, provide the test solution which divide full function to module and implemented the cases with Python which help to increase test capacity to 16 times. At the same time, actively study customer traffic model which improve the reliability of Lab test data
User360 CLI FT Automation: Found the shortcomings of existing automated and functional tests, took the initiative to undertake the development of test cases and integrate them into the existing automated test system which improves the coverage of automated tests and product quality
These experience helps me to get Program Recognition Award during this time
- UPG release team ST tester
2016.5 – 2017.9 Focus on Node System test as an FT tester, report 150+ system trouble reports. Write some automation tools which help team to set up test environment. Win Program recognition Award in UPG All Employee Meeting as a quick learner
Efficiently and actively solved customer issues during this time which helps me win Program Recognition Award as a quick trouble-shooter

EDUCATION

- **2013.9 – 2016.4** Master of Communication & Information System in Shanghai University
- **2009.9 – 2013.6** Bachelor of Communication engineering in Shanghai Normal University

SKILLS

Linux/Shell Python Jenkins/Git/SQL/SoapUI/CI

WHAT ATTRACTS ME

Product management, solution analysis and test automation
